lung
lung (ext.)
kidney B
immune
kidney A
a
within-factor AUROC
layer
smallest effect of interest
detectable (80%)
|co-expression|
b
within-factor AUROC (L_0)
scGPT cosine (primary)
in-degree held fixed
residualised on covariates
ChIP-seq positives
≥ 2 publications
factors often in input
|co-expression|
GENIE3
GRNBoost2
co-occurrence (Word2Vec)
probe: target only
probe: bilinear interaction
B cells, active factors
c
minimum detectable AUROC
documented pairs
80/20 split,
49 positives
